## Achievement

### 1. Laboratory Management System

Developed the Laboratory Management System application on JAVA using spring framework. Used Postman and the client software during the training program's first stage of the case study assessment.

In the backend, I make use of spring boot and microservices to perform operations and secure it using JWT authentication. And uses the MongoDB database. Angular is used for the user interface.

### 2. Capgemini Degreed Platform

Learnt the concepts of Git and GitHub, simultaneously applied the concepts for better learning. Developing the website for case study using Angular.
